Why Supervised Visitation & Exchange?

Parents have a shared responsibility for their children. Most often, children benefit from having regular contact with both parents, regardless of the parents' relationship.

Supervised Visitation and Exchange Services are for the benefit of children that may not have safe, conflict-free contact with one or both parents without the intervention of a neutral person.

Do I Really Need These Services?

- Are your children being caught in emotional, physical or verbal crossfire when your former spouse comes over, or when you go to pick them up?
- It is not necessary to have a court order to use our services.
- Many parents who want to protect their children from unnecessary anxiety use monitored exchange services by mutual agreement.

What Services Do We Provide?

Exchanges - This service allows children to go from one parent to the other without the parents meeting.

Supervised Visitation – This service is generally court ordered and a trained visitation monitor supervises the visit with parent and child solely as a neutral observer.

Therapeutic Visitation - This is generally court ordered and is with a licensed therapist who provides redirection and education regarding parenting skills and appropriate parent-child interaction.

Documentation - The provider keeps records of all exchanges and supervised visits.

What Can I Expect?

- Child Focused Environment
- No Contact Between Parents
- Emergency Security Devices
- Separate Entrances

Where Do Visits Take Place?

KIDZ SAFE provides visits in a neutral, comfortable home-like environment to encourage positive family time. The visitation has comfortable furniture, games, toys and activities for young and older children.

If weather and safety allows, visits may take place outside or may include a one block walk to the city soccer fields for a large outdoor area for play.
